

REMARKS

The Applicants wish to thank the Examiner for thoroughly reviewing and considering the pending application. The Office Action dated June 2, 2004 has been received and carefully reviewed. Claims 1 and 23 have been amended. No new matter has been added. Claims 1-26 are currently pending. Reexamination and reconsideration of the pending claims is respectfully requested.

As an initial matter, the Examiner is thanked for the indicated allowability of claims 8-22 and the allowable subject matter of claim 26.

The Office Action rejected claims 1-7 and 23-25 under 35 U.S.C. § 102(e) as being anticipated by U.S. Patent No. 6,115,016 to *Yoshihara et al.* (hereinafter "*Yoshihara*"). The rejection of claims 1-7 and 23-25 is respectfully traversed and reconsideration is requested.

As required in Chapter 2131 of the M.P.E.P., in order to anticipate a claim under 35 U.S.C. § 102, "...the reference must teach every element of the claim." The Applicants respectfully submit that *Yoshihara* does not teach each and every element in claim 1. To further illustrate, as amended, claim 1 recites a combination of elements including, for example, a field sequential liquid crystal display panel comprising, "a means for controlling a lighting speed of each of light sources Red, Green and Blue, where the light sources are sequentially driven wherein the means indicates a stressed color corresponding to one of the light sources." The Applicants respectfully submit that *Yoshihara* does not disclose a means which indicates a stressed color corresponding to a light source.

Likewise, the Applicants respectfully submit that *Yoshihara* does not teach each and every element recited in amended claim 23. For example, claim 23 recites a method of color image display for a field sequential liquid crystal display device including an image signal processor comprising, among other features, "driving a fourth light source having a combination

of the light sources at a fourth sub-frame.” The Applicants respectfully submit that *Yoshihara* does not disclose this feature.

Accordingly, the Applicants respectfully submit that *Yoshihara* does not disclose each and every element recited in claims 1 and 23, as required under 35 U.S.C. § 102(e) and claims 1 and 23 are therefore allowable over *Yoshihara*. Claims 2-7, which depend from claim 1; and claims 24 and 25, which depend from claim 23, are also allowable for at least these reasons and for the additional novel features claimed therein.

In view of the above, each of the presently pending claims in this application is believed to be in immediate condition for allowance. Accordingly, the Examiner is respectfully requested to pass this application to issue.

The Applicant hereby authorizes the Commissioner of Patents to charge any fees necessary to complete this filing, including any fees required under 37 C.F.R. § 1.136 for any necessary Extension of Time to make the filing of the attached documents timely, or credit any overpayment in fees, to Deposit Account No. 50-0911. Further, if these papers are not considered timely filed, then a petition is hereby made under 37 C.F.R. § 1.136 for the necessary extension of time.

Dated: August 31, 2004

Respectfully submitted,

By
